## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 - 34 and 50 - 65, drawn to a bond pad structure in a semiconductor device, classified in class 257, subclass 782.
  - II. Claims 35 - 49 and 66 - 68, drawn to a method of forming a bond pad structure comprising a first and second bond pad, classified in class 438, subclass 1+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by a materially different process such as without etching the first metal layer to form first and second lower metal layers having a space thereinbetween, for example, depositing an insulating layer on a substrate; patterning the insulating layer; and depositing a metal layer in the insulating layer.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, have acquired a separate status

Art Unit: 2815

in the art because of their recognized divergent subject matter, and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chris C. Chu whose telephone number is (703) 305-6194. The examiner can normally be reached on M-F (10:30 - 7:00).
